Course Delivery

Please make suggestions as to how the course delivery could be improved ?

Expain things more. Dont assume that people know something even if it seems fairly obvious or simple	Anonymous		N	Oct 10 2011
Online tests. Separate from the continuous assessment. Just to see do we follow the material.	Anonymous		N	Oct 10 2011
in the tutorials the lecturer could take it slower and be clear about the matyerial he is covering.	Anonymous		N	Oct 10 2011
Stop talking about drive!	Anonymous		N	Oct 10 2011
often can't see the drawings on the light projector	Anonymous		N	Oct 10 2011
look at past papers, the way questions are phrased and interpretation of them	Anonymous		N	Oct 10 2011
I think that the projector slides which Prof. Destrade draws up during lectures should be made available on blackboard. This would be helpful in the event of missing a lecture.	Anonymous		N	Oct 10 2011
cut out the 9am's, have the lectures in the eng building	Anonymous		N	Oct 10 2011
I would like to be able to grab a problem with my hands and move it around like I did with the hands of the clock when I was a child. I think we are all naturally capable of understanding mathematical concepts if our senses are stimulated in the appropriate way for each individual. You can't explain to someone what the shape of an egg feels like, the best way to do that is to give them an egg, at the very least they will learn what an egg is not.	Anonymous		N	Oct 10 2011
I can't think of anything I feel need changing	Anonymous		N	Oct 11 2011

lecturer is very enthusiastic, i usually find it difficult to concentrate for the full hour of lectures but do not in this module, the lecturer does a great job at holding the classes attention and explaining what he is teaching.	Anonymous		N	Oct 13 2011
