2	<p>This module is really enjoyable, and the lecturer is great. Very approachable and friendly, and he explains all the concepts very well, with multiple worked examples. Michel is always ready to answer any questions, and he makes sure that each topic is thoroughly dealt with before moving on. The tutorials are also excellent, there are lots of opportunities to go over any tricky concepts, which is very helpful in understanding the material. I find the material to be really interesting and because it is explained so well both in class and tutorials, I feel that I have a pretty good grasp of the material covered so far. The continuous assessment is great, it is always good to go in to an exam with a decent percentage already in one's pocket, so to speak. The only thing I would say is that I would much prefer more written homework CA instead of in-class tests, because I find that I learn a lot more from doing out homeworks, and it gives us the opportunity to really go through every part in detail, and of course an excuse to go to SUMS and really iron out any tricky bits. However, Michel really dealt with the CA issue very fairly, giving us the option to complete a written HW if we choose, aswell as the in-class tests, which I thought was very fair to those of us that do prefer written homework, plus an extra 10% going into the exam is nothing to sneeze at! Overall, this is one of my favourite modules this year, and I'm very much looking forward to part 2 in the second semester.</p>	10/29/2014 11:34 AM
3	<p>More assignments would be useful in improving my understanding of course material</p>	10/29/2014 11:02 AM
4	<p>Very impressed with this module! Good work</p>	10/29/2014 5:26 AM

1	Brilliant tutor. Very approachable.	11/3/2014 12:53 PM
2	Tutor is very busy, wish he was available more often, but I understand how busy a final year PhD student must be	10/30/2014 4:23 AM

1	I never miss a lecture/tutorial if at all possible.	10/29/2014 11:35 AM
2	Family issues	10/29/2014 10:40 AM
3	In maths subjects I believe it is very important to keep on top of material from the beginning as if you get left behind it can be very hard to catch up again. The best way to do this is to regularly attend the lectures and tutorials.	10/29/2014 5:27 AM

1	Continuous assessment structure is very good, substantial CA percentage for moderate work load. I also find the structure of the tutorial session (as well as the tutor) very satisfactory. Overall, I am very happy with the subject, lecturer and tutor.	11/3/2014 4:41 AM
2	Michel is amazing	10/29/2014 10:40 AM
